

Software Engineering Micro Project – Student Instructions

Course Code: PECST411

Course: Software Engineering

Programme: B.Tech Computer Science and Engineering , NSS College of Engineering

Semester: S4

Report Formatting Guidelines

- Recommended report length: 18–25 pages
- Font: Times New Roman, 12 pt
- Line spacing: 1.5
- Diagrams must be clearly labelled
- Tables must have proper captions

Required Sections

1. Cover Page
2. Abstract
3. Introduction
4. Problem Statement
5. Requirement Analysis
6. Feasibility Study
7. Software Requirement Specification (SRS)
8. System Design
9. UML Diagrams
10. Coding Strategy
11. Testing Strategy
12. Deployment Plan
13. Reflection and Learning Outcomes
14. References
15. Appendix – Product Screenshots

Appendix Requirement (Mandatory)

The appendix must contain screenshots of the product developed by the team. These screenshots should demonstrate the major functionalities of the system.

Include screenshots such as:

- System home page
- Login interface
- Dashboard or main module
- Data entry forms
- Functional module operations
- Output screens or reports

Each screenshot must include a figure number and a short description.

Recommended number of screenshots: 6–10.

Evaluation (15 Marks)

Problem Statement Quality – 2

Requirement Analysis & Refinement – 3

Feasibility Study – 2

Design & Patterns with Justification – 3

UML Diagrams – 2

Testing Strategy & Test Case Design – 2

Final Compiled Report & Reflection – 1
