

Software Engineering Micro Project Report Template

Course Code: PECST411

Course Name: Software Engineering

Programme: B.Tech Computer Science and Engineering

Semester: S4, Batch : A / B

Project Title: _____

Team Members:

1. _____
2. _____
3. _____
4. _____
5. _____

NSS College of Engineering Palakkad

Department: Computer Science and Engineering

Submission Date: _____

Abstract

Provide a brief summary of the project (150–200 words).

1. Introduction

Background of the problem, objectives, and scope of the system.

2. Problem Statement

Initial problem statement, ambiguities identified, and refined statement.

3. Requirement Analysis

Requirement ID	Description
FR1	Describe requirement
FR2	Describe requirement
FR3	Describe requirement

4. Feasibility Study

Technical, Economic and Time feasibility.

5. Software Requirement Specification (SRS)

System overview, features, assumptions and constraints.

6. System Design

Architecture diagram, module design, cohesion and coupling analysis.

7. UML Diagrams

Include Use Case Diagram and Class Diagram.

8. Coding Strategy

Tools used, programming language, version control, and coding standards.

9. Testing Strategy

Test Case ID	Input	Expected Output	Result
TC1	Input data	Expected result	Pass/Fail
TC2	Input data	Expected result	Pass/Fail
TC3	Input data	Expected result	Pass/Fail

10. Deployment Plan

Deployment environment and maintenance considerations.

11. Reflection and Learning Outcomes

Discuss challenges faced during client interaction and lessons learned.

12. References

List textbooks, articles, and online resources used.

13. Appendix A – Product Screenshots (Mandatory)

Include screenshots demonstrating the working product developed by the team. The screenshots must clearly show the main functionalities of the system.

Recommended screenshots:

- System Home Page / Main Interface
- Login Page (if applicable)
- Dashboard or main module
- Data entry / functional module
- Output or report generation screen
- Sample execution results

Include 6–10 screenshots. Each screenshot must have a figure number and a short caption.
